

POSIWEAR® M3 utilizes five layers of polypropylene (SMMM5) for an extremely high level of protection against particulates and water-based liquids. The material is constructed of three inner layers of meltblown polypropylene surrounded by a spunbonded polypropylene exterior. High level of breathability. Ideal for use in heavy dust environments or for general maintenance.

## POSIWEAR® M3 Coveralls

Overall protection from particulates and water-based liquids. Zipper front for easy donning. Several configurations available. Specify size when ordering.

## POSIWEAR® BA

POSIWEAR® BA (Breathable Advantage) is constructed of a microporous polyethylene film bonded to spunbonded polypropylene. The material offers good resistance to dry particulates and chemical-based sprays without sacrificing breathability. Ideal for manufacturing, pressure washing, painting, resurfacing or fiberglass handling. Extremely low linting.

## ProShield® NexGen®

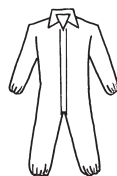

The ultimate combination of solid protection and a low cost. Based on patented microporous technology, NexGen is a cloth-like, comfortable fabric. Ideal wherever general protective clothing is worn, and ideal for nontoxic liquid and spray hazards. It provides a true aerosol and liquidproof barrier.

## POSIWEAR® BA Coveralls

Zipper front closure for easy donning. Specify size when ordering. White.

## KleenGuard® A20 Breathable Particle Protection Coveralls

Economical protection against particulates and water-based liquids. The patented breathable MicroForce™ Barrier SMS fabric keeps workers cool and comfortable and is also strong and abrasion resistant for extended wear. Fabric offers improved barrier protection on submicron size particles (0.26 micrometers). Elastic in the back for enhanced fit. Patented Reflex® design is 7½ times less likely to rip out than ANSI minimums, and it provides 12% more chest room and a 6% longer body length. Ideal for use in general industrial applications, manufacturing, assembly operations and food processing. NFPA 99 compliant antistatic material. Specify size when ordering.

## KleenGuard® A30 Breathable Splash and Particle Protection Coveralls

Made from a heavier weight of the breathable MicroForce® Barrier SMS fabric that gives all KleenGuard garments their excellent particle holdout. The patented combination of abrasion-resistant spunbond polypropylene outer layers around a middle layer of webbed microfibers protects against submicron-sized dry particles and water-based sprays, but remains extremely breathable. The extra durability of KleenGuard A30 is ideal for manufacturing and assembly operation, food processing, printing, and working with fiberglass. Each Coveralls style has a zipper front with a 1" flap and an elastic back. Patented Reflex® design is 7½ times less likely to rip out than ANSI minimums, and it provides 12% more chest room and a 6% longer body length. 25 times more breathable with comparable particle holdout to Tyvek®. NFPA 99 compliant antistatic material. White.

## KleenGuard® A40 Liquid and Particle Protection Coveralls

Provide a high level of general-application protection against particles and a select range of liquids. Cost-effective Coveralls are breathable and lightweight, which means they can be worn for extended periods of time. Made from a microporous film laminate and a soft nonwoven fabric. Better liquid barrier, better particulate barrier, lower in lint than Tyvek®. A zipper front closure makes donning easy. Specify size when ordering. Meets ANSI and ISEA 101-1996 standards. Passes NFPA 99 criteria for antistatic materials. White.

## KleenGuard® A60 Bloodborne Pathogen and Chemical Splash Protection Coveralls

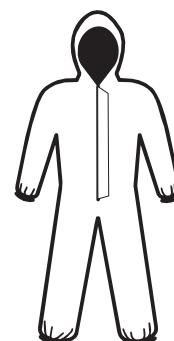

Made of a three-layer fabric that offers bloodborne pathogen and chemical splash protection with breathable comfort. Two tough, cloth-like outer layers are constructed of spunbond polypropylene that forms a barrier to protect against tearing and abrasion. Its middle layer of microporous film repels many nonhazardous liquids and allows heat and sweat vapor to escape, keeping the worker comfortable. The fabric also provides resistance to many dry particulates. Repellency is maintained, even when pressure, such as kneeling or flexing, is applied to fabric. Zipper front has a storm flap. Elastic in the back for enhanced fit. Patented Reflex® design is 7½ times less likely to rip out than ANSI minimums, and it provides 12% more chest room and a 6% longer body length. Passes ASTM F1670/1671 testing for penetration of blood, body fluids and bloodborne pathogens. Specify size when ordering. Denim Blue.

# MicroMAX

## MicroMAX® Limited-Use Apparel

**Superior microporous protection at a very affordable cost.**

MicroMAX from Lakeland Industries employs highly advanced microporous technology. This line of general-purpose protective clothing can be used in any nonhazardous environment where dirt, grime, splashes and spills are present. MicroMAX fabric is comprised of a microporous film with a nylon scrim between the film and substrate that gives the material additional strength. Durable protection and an affordable price. White.

**Apron** has sewn ties and comes in sizes 28 x 36" or 28 x 44".

**Sleeves** are 18" long and have elastic ends which ensure a secure fit around the arms and wrists.

**Coveralls** provide cost-effective, limited-use protection from head to toe. Serged seams offer added protection and durability. Zipper front closure. Specify size when ordering. (Oversize charge for size 3XL and larger.)

**Lab Coat** provides economical splash and dry particulate protection. Serged seams offer added protection and durability. The front closure fastens with three snaps. The two-pocket style has sewn-on hip and breast pockets for convenient personal storage. Specify size when ordering. (Oversize charge for size 2XL and larger.)

**Shoe and Boot Covers** offer limited-use foot protection and have a vinyl sole for added traction and durability. Shoe Cover has an elastic top, while the Boot Cover has both an elastic top and elastic around the ankle for a secure, nonslip fit. One size available.

## Endurosaf® Apron

Made of Enduro 2000™, a breakthrough high tech film that is exceptionally strong and resistant to punctures, abrasions and deterioration from oils and fats. Outperforming vinyl by 10 to 1, it also remains flexible to -65°F and will withstand heat to 180°F. The satiny-smooth surface resists a wide range of chemicals, repels liquids and is easy to clean. Apron features dielectrically sealed side ties and 1" neck straps that adjust using noncorrosive, nonabsorbent plastic buckles. FDA accepted materials.

**Ansell**

## Disposable Polyethylene Apron

Economical protection allows you to wear once and throw away. Made of polyethylene for excellent flexibility and resistance to chemicals, oils, fats and grease. Easy to wipe down and keep clean. White.

**Ansell**

## Silver Shield® Clothing

Uses a lightweight, flexible laminate that is highly impermeable to a wide range of solvents, acids, and bases commonly used in industrial applications. Distinctive silver color prevents confusion with less-impermeable apparel. **Apron** features neck and side ties. **Sleeves** protect the arms from chemical splash and have elastic at both ends for a secure fit. **Booties** may be used inside boots or workshoes as a liner, or externally as a cover. **Warning:** Booties offer minimal abrasion resistance and should not be worn as outer protection where the risk of snags, punctures or abrasion is high.

Heat-Sealed Seam

## Tychem® QC Polycoated Coveralls

DuPont™ Tychem QC is made from DuPont Tyvek® that has been "Quality Coated" with 1.25-mil polyethylene for reduced permeability to moisture, vapor and air. The material provides splash protection against many inorganic acids, bases and other liquid chemicals. Heat-sealed seams are sewn and then sealed with a heat-activated tape for increased holdout of liquids and dry particulates. Yellow. Specify size when ordering. (Oversize charge for size 2XL and larger.)

## Tychem® SL Coveralls and Level B Suit

This material is made from standard DuPont™ Tyvek® laminated with Saranex 23-P film. This laminated material provides superior barrier protection against a broader range of hazardous liquids, toxic chemicals and minute particles than polyethylene-coated fabrics can provide. The material has zero permeability to air and moisture.

**Coveralls** feature storm flaps over the zippers. Heat-sealed seams are sewn and then sealed with a heat-activated tape. This method provides liquidproof seams. Also available in a fully encapsulated **Level B Suit** with front or rear entry. The suit has an expanded back or flat back, 20-mil PVC faceshield, elastic wrists and sock boots with splash guards. White. Specify size when ordering. (Oversize charge for size 2XL and larger.)

## Tychem BR Sleeves

Sleeves are 18" long and have elastic ends for a secure, comfortable fit. One size.

## DuPont™ Tychem® BR Coveralls and Fully Encapsulated Level B Suits

DuPont™ Tychem BR fabric provides greater than eight-hour breakthrough times for most ASTM F1001 chemicals, offering high-quality chemical protection, user flexibility, abrasion resistance and exceptional freedom of movement. Seams are sewn, then heat sealed, for excellent resistance to stress and chemical penetration. Bright safety yellow color is easy to see, even in smoke or fog. **Coveralls** feature front zipper closure with storm flap. **Level B Suit** has a 20-mil PVC standard view faceshield. Features include attached sock boots and outer boot flaps, elastic wrists, knee pads, one or two exhaust ports, and a 48" zipper closure protected by storm flap. Suit is available with an expanded back for an SCBA, or a flat back better suited to an airline.

Specify size when ordering. (Oversize charge for sizes 2XL and larger.)

## DuPont™ Tychem® TK Fully Encapsulated Level A Suits

Tychem TK fabric offers outstanding protection from highly toxic, corrosive chemicals, providing greater than eight-hour holdout times for all ASTM F1001 challenge chemicals. **Deluxe Level A Suit** is durable enough to handle emergency response and remediation work. It has a patented two-layer faceshield (10-mil Teflon®, 40-mil PVC), available in standard width or wide-view. Seams are sewn, then heat sealed on the inside and outside, for excellent resistance to stress and chemical penetration. A three-layer glove system combines Butyl®, North Silvershield® and outer knit Kevlar®. Other features include attached sock boots with boot flaps, an internal 1½" waist belt with belt loops, elastic wrists, two exhaust valves, knee wear pads, and a double storm flap with Velcro® over a gastight zipper. **Standard Level A Suit** has seams heat sealed on the outside only. Bright lime yellow color is easy to see, even when visibility is limited. Suit is available with an expanded back for an SCBA, or a flat back better suited to an airline. Storage bag included. Specify size when ordering. (Oversize charge for sizes 2XL and larger.)

## DuPont™ Tychem®

**Tychem® CPF 1** provides protection from dry particulates and light splash. Made of multilayered barrier film over 1.5-oz polypropylene for strength and splash resistance. Ideal for handling acids or agrichemicals.

**Tychem® CPF 2** provides greater tear-resistance and chemical hold-out without restricting movement. Constructed of Saranex® 23-P barrier film laminated to tough 1.5-oz polypropylene. Ideal for hazardous waste cleanup.

**Tychem® CPF 3** offers heavy-duty chemical splash protection. Made of multilayered barrier film laminated to 2-oz polypropylene for greater chemical hold-out. Ideal for rigorous activities.

**Tychem® CPF 4** offers superior protection against a broad range of chemicals. Made of a multifilm composite barrier laminated to a strong polypropylene substrate. Ideal for handling petrochemicals and emergency response.

### Tychem® CPF 1 Coveralls

CPF 1 Coveralls offer lightweight comfort and durability. Feature a zipper front closure and serged seams. Specify size S-XL when ordering. (Oversize charge for sizes larger than XL.) Blue.

### ChemTape®

When taping protective clothing, don't use standard duct tape. Get full protection with ChemTape. It offers the assurance of a chemical-tested product for added peace of mind. ChemTape provides reliable barrier protection and is ideal for use in attaching protective clothing components to each other. It can also be used to seal equipment covers, tents or shelters.
