

Extra protection for chemotherapy drugs and chemical splash

FEATURES AND BENEFITS:

Reliable Hazard Protection

Extended cuff provides additional protection for the wrist and arm for hazardous environments. Advanced nitrile formulation offers up to 3 times the puncture resistance of latex or vinyl disposable gloves. Combined with the lowest acceptable pinhole rates (AQL 0.65) these gloves help set a new standard in protection.

Increased Productivity

Non-stick properties are built into the glove formulation to create a resistance to tape or adhesives, and to assist workers with improved efficiency and speed.

Secure and Confident Grip

Textured fingers ensure strong, efficient grip and excellent worker protection.

Protection from Type 1 Allergies

Constructed without natural rubber latex materials or powder to help protect from allergies, skin irritation and dryness.

Chemical Resistance

Meets or Exceeds NIOSH recommendations for Fentanyl and its analogues. Laboratory tests confirm **no permeation of Fentanyl or gastric acid (vomit) when exposed for greater than 240 minutes**, providing comprehensive protection in overdose situations.

Approved for use with chemotherapy drugs
