

XL SERIES PLIERS

- › Exclusive Flush Fastener provides better access with increased user adjustability making it 30% narrower.
- › Flush Fastener allows pliers to lay flat in the work place and prevents snagging on tool belts/pouches.
- › Flush Fastener is a nut and bolt assembly and can easily be adjusted by the end user in the field.

TONGUE & GROOVE

- › Jaws are milled with deep self-gripping pipe wrench style teeth for maximum bite.
- › Accurately machined undercut tongue and groove points for precision movement and joint strength.

COMBINATION SLIP-JOINT

- › Jaws are milled with deep, sharp, lobster claw design that give two gripping areas with each position.
- › Combination pliers have shear type cutters
- › Non-gripped versions are complemented with deep, strong, drop forged knurled impressions making it non-slip. The impressions can also be used to file off a burr when on the go!

PRODUCT #	DESCRIPTION	OVERALL LENGTH (IN)	JAW THICKNESS (IN)	JAW WIDTH (IN)	JAW LENGTH (IN)	WEIGHT (LBS)
J261SGXL	Groove Joint Pliers w/Grip - 5"	5	15/64	3/4	31/32	0.15

XL SERIES PLIERS

SOLID JOINT

- › Jaws are milled with sharp, accurate teeth.
- › Induction hardened cutting edges, equally aligned for precision cut. All cutting pliers designed with near flush cutting action.
- › Accurately machined joints assembled with permanent rivet for strength and precision movement.
- › Pliers with teeth on inside joint are milled parallel with plier halves for perpendicular grab while pulling wire, fish tape, etc.
